SUGGESTED INTERVIEW QUESTIONS
for God on the Brain

1. Why do you think there is such a fascination with the brain among scholars today?
2. Has science shown us that belief in God is out of step with the modern world?
3. Do human beings have souls or are we just bodies? Why does it matter? Do the majority of people around the world believe in the soul or not?
4. What does science say about experiencing God, and how does that relate to Christian teaching?
5. What are the naturalistic evolutionary explanations for belief in God? What does Scripture teach?
6. If human beings are just bodies, what are the implications for freedom, morality, and even science?
7. What is a biblical view of the naturalness of religious belief?
8. There is a popular premise that states “the only possible good reasons for believing in something must be scientific.” What is wrong with this premise?
9. How would you respond to someone who claims that “what happens in nature” is different than how God works?
10. What is the biggest misconception that Christians have about the brain?
